SEVIN® brand 4F Carbaryl Insecticide
For Control of Ghost & Mud Shrimp in Oyster
Beds

EPA Reg. No. 264-349

SLN. No. WA-100001

24(c) Supplemental Label

FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF WASHINGTON

This label for SEVIN® brand 4F Carbaryl Insecticide expires and must not be distributed or used in accordance with this SLN registration after December 31, 2012.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. This label must be in the possession of the user at the time of pesticide application. Follow all applicable directions, restrictions, and precautions on the EPA registered label.

USE INFORMATION AND RESTRICTIONS

SEVIN® brand 4F Carbaryl Insecticide is a suspension of microfine SEVIN® Carbaryl Insecticide in an aqueous medium. It readily disperses in water to form a spray which may be applied by ground or air equipment.

APPLICATION INFORMATION

Calibrate and adjust application equipment to insure proper rate and accurate placement. To clean spray system after use, drain and flush with a water and detergent mixture. Rinse thoroughly with clean water. Refer to the Container Disposal Guidance section for disposal instructions.

MIXING, LOADING AND HANDLING INSTRUCTIONS

TO ASSURE A UNIFORM SUSPENSION, AGITATE, STIR OR RECIRCULATE ALL CONTAINERS OF THIS PRODUCT PRIOR TO USE. Remove oil, rust, scale, pesticide residues and other foreign matter from mix tanks and entire spray system. Flush with clean water. Fill spray or mix tank with 1/2 to 3/4 the desired amount of water. Start mechanical or hydraulic agitation. Slowly add the required amount of SEVIN brand 4F Carbaryl Insecticide and then the remaining volume of water. Include rinse water from container. Prepare only as much spray mixture as can be applied on the day of mixing. MAINTAIN CONTINUOUS AGITATION DURING MIXING AND APPLICATION TO ASSURE A UNIFORM SUSPENSION. DO NOT STORE SPRAY MIXTURE FOR PROLONGED PERIODS OR DEGRADATION OF CARBARYL MAY OCCUR. Local water conditions may also accelerate the degradation of spray mixtures containing carbaryl.

OYSTER BEDS: For control of ghost shrimp and mud shrimp in beds used for oyster culture. SEVIN® brand 4F Carbaryl Insecticide shall be applied at rates not to exceed 8 quarts of product per acre (8 lbs active ingredient per acre). Constant agitation must be maintained to prevent settling.

Restrictions:

- For distribution and use only by applicants approved under a National Pollutant Discharge Elimination System Waste Discharge Permit (NPDES) issued by the Washington State Department of Ecology. All applicators must secure coverage under a NPDES Permit prior to making any applications under this SLN.
- Treatment is allowed only on ground with no oysters within one year of harvest present. All ground must be properly staked and flagged to protect adjacent shellfish and water areas.
- Do not apply SEVIN® brand 4F Carbaryl Insecticide within the following distances of sloughs, channels or oysters which are within one year of harvest:
 1. 200 feet for application by helicopter
 2. 50 feet for application by hand sprayer

Container Disposal Guidance: WSDA Container Disposal Guidance: Pesticide containers must be properly cleaned prior to disposal. The best time to clean empty pesticide containers is during mixing and loading, because residue can be difficult to remove after it dries. Triple rinse (or pressure rinse) the pesticide container, empty all pesticide rinse water into the spray tank, and apply to a labeled crop or site. Recycling cleaned containers is the best method of container disposal. Information regarding the recycling of empty and cleaned plastic pesticide containers in Washington is available on the WSDA Waste Pesticide Program web site at <http://agr.wa.gov/PestFert/Pesticides/WastePesticide.aspx>. Cleaned containers may also be disposed of in a sanitary landfill, if permitted by the county. Burning is not a legal method of container disposal in Washington.

This product is extremely toxic to aquatic invertebrates.
