RE: Revision of EPA SLN Registration number: WA-950036b

Enclosed is revised labeling for Washington Special Local Need (SLN) registration number WA-950036b issued to Syngenta Crop Protection for applications of Bravo® Weather Stik®, Agricultural Fungicide (EPA Reg. No. 50534-188-100), on spinach and Swiss chard grown for seed for control of diseases. This supplemental distributor SLN registration was issued under authority of Section 24(c) FIFRA.

Any action taken on or changes made to the primary SLN registration also affects the distributor SLN registration. If GB Biosciences, Inc. decides to voluntarily cancel the primary SLN registration, the Syngenta registration is automatically cancelled. It is your responsibility to communicate with GB Biosciences, Inc. and to stay current with planned changes to the primary SLN registration.

If you have any questions, please me at (360) 902-1972 or by email at wswheeler@agr.wa.gov.

PESTICIDE MANAGEMENT DIVISION

Sincerely,

Wendy Sue Wheeler
