

WILBUR-ELLIS®

Section 24(c) Special Local Need (SLN) Supplemental Label

FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF WASHINGTON, EAST OF THE CASCADE MOUNTAINS

SUPERIOR SPRAY OIL N.W.

EPA REG. NO. 2935-405

EPA SLN NO. WA-980023

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. This label and the federal label for this product must be in the possession of the user at the time of pesticide application. Follow all applicable directions, restrictions and precautions on this Supplemental label and the label for EPA Reg. No. 2935-405.

The labeling must be in the possession of the user at the time of application.

Following all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the label for EPA Reg. No. 2935-405.

CROP/SITE/PEST: For the control of hop powdery mildew, (*Spaerotheca humuli*) on Hops.

APPLICATION RATE AND CONCENTRATION: Use 1-5 gallons per 100 gallons of water.

COMPATIBILITY INFORMATION:

Do Not Use propargite (Omite) during, with or following an oil spray.

METHOD OF APPLICATION (FREQUENCY/TIMING): Apply by ground equipment only. Thorough coverage is essential. From 50- 150 gallons of diluted spray emulsion per acre depending on plant size. (150 gal/acre rate is for when the plants are larger and to the wire.) Use spray equipment that ensures producing small uniform spray droplets, best achieved with high spray pressure (minimum of 175 psi) and ceramic hollow cone nozzles.

Make first application at first sign of infection. Repeat every 7-14 days depending on level of new growth. Use shorter spray interval and/or higher rate when conditions for disease development are more severe. Post-harvest applications can be made to reduce overwintering inoculum.

Pre-harvest interval: No interval required.

Restrictions/Precautions: Do not enter or allow entry into treated areas during the restricted-entry interval (REI) of 12 hours.

Do not apply this product through any type of irrigation system.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters. Apply this product only as specified on the label for EPA Reg. No. 2935-405.

Superior Spray Oil N.W. should not be used under this SLN label where impact on listed threatened or endangered species is likely. You may refer to the WSDA Endangered Species Program web site at <http://agr.wa.gov/PestFert/NatResources/EndangSpecies.aspx>, or contact the Washington Department of Fish & Wildlife, National Marine Fisheries Service (NOAA Fisheries) or US Fish & Wildlife Service for information regarding aquatic species listed as threatened or endangered. Consult the federal label for additional restrictions and precautions to protect aquatic organisms.

WSDA Container Disposal Guidance: Pesticide containers must be properly cleaned prior to disposal. The best time to clean empty pesticide containers is during mixing and loading, because residue can be difficult to remove after it dries. Triple rinse (or pressure rinse) the pesticide container, empty all pesticide rinse water into the spray tank, and apply to a labeled crop or site. Recycling cleaned containers is the best method of container disposal. Information regarding the recycling of empty and cleaned plastic pesticide containers in Washington is available on the WSDA Waste Pesticide Program web site at <http://agr.wa.gov/PestFert/Pesticides/WastePesticide.aspx>. Cleaned containers may also be disposed of in a sanitary landfill, if permitted by the county. Burning is not a legal method of container disposal in Washington.

This label for Superior Spray Oil N.W. expires must not be distributed or used in accordance with this SLN registration after December 31, 2015.
