

RESTRICTED USE PESTICIDE

Due to acute toxicity to humans, aquatic organisms, and avian species. For retail sale to and use only by certified applicators or persons under their direct supervision, and only for those uses covered by the certified applicator's certification.

THONEX[®] 3EC INSECTICIDE

EPA REG. NO. 66222-63

EPA SLN NO. WA-030013

FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF WASHINGTON

DIRECTIONS FOR USE

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA registered label.
- This labeling must be in the possession of the user at the time of application.

CROP	PEST	RATE	COMMENTS
Hybrid poplar grown for pulp or wood production	Eriophyid Mite	2-3 quarts per acre	Make applications when mites first appear or when feeding damage is noticed. Coverage of upper and lower leaf surfaces is essential for good control. Apply by ground in sufficient water for thorough coverage, or by air in a minimum of 5 gallons of water per acre. Ground application is most effective when poplar plantations are first established.

RESTRICTIONS / PRECAUTIONS

- Do not enter or allow worker entry during the restricted entry interval (REI) of 2 days.
- Do not apply more than 4 quarts of Thionex 3EC per acre per year.
- A 30 foot vegetative buffer strip must be maintained between all areas treated with this product and rivers, natural ponds, lakes, streams, reservoirs, marshes, estuaries, and commercial fish ponds.
- Do not apply this product through any type of irrigation system.
- This pesticide is extremely toxic to fish and aquatic invertebrates and toxic to birds and mammals. Thionex 3EC must not be used under this SLN label where impact on the threatened or endangered species is likely. You may refer to the WSDA Endangered Species Program web site at <http://agr.wa.gov/PestFert/NatResources/EndangSpecies.aspx> or contact the Washington Department of Fish and Wildlife, National Marine Fisheries Service (NOAA Fisheries) or US Fish & Wildlife Service for information regarding aquatic species listed as threatened or endangered. Consult the federal label for additional restrictions and precautions to protect aquatic organisms.
- This product is toxic to bees exposed to direct application. Do not apply this product or allow it to drift to blooming broadleaf weeds within or adjacent to the poplar plantation. Broadleaf weed bloom must be controlled prior to the application.
- For ground boom applications, do not apply within 100 feet of rivers, natural ponds, lakes, streams, reservoirs, marshes, estuaries and commercial fish ponds. For aerial applications, do not apply within 300 feet of rivers, natural ponds, lakes, streams, reservoirs, marshes, estuaries and commercial fish ponds.

WSDA CONTAINER DISPOSAL GUIDANCE

Pesticide containers must be properly cleaned prior to disposal. The best time to clean empty pesticide containers is during mixing and loading, because residue can be difficult to remove after it dries. Triple rinse (or pressure rinse) the pesticide container, empty all pesticide rinse water into the spray tank, and apply to a labeled crop or site. Recycling cleaned containers is the best method of container disposal. Information regarding the recycling of empty and cleaned plastic pesticide containers in Washington is available on the WSDA Waste Pesticide Program web site at <http://agr.wa.gov/PestFert/Pesticides/WastePesticide.aspx>. Cleaned containers may also be

disposed of in a sanitary landfill, if permitted by the county. Burning is not a legal method of container disposal in Washington.

This label for Thionex 3EC expires and must not be distributed in accordance with this SLN registration after May 31, 2011. It is unlawful to use this product on hybrid poplar grown for pulp or wood production after July 31, 2012.
